

## Made in Washington...

When it comes to solar electric (PV), made in Washington State is a great way to go. With higher incentives, local jobs, and a manufacturer that knows our climate, it's pretty easy to see why. The payback on these systems is averaging about 5 years...worth the little bit higher cost.

### 3X Higher Incentives:

Made in WA solar PV systems have a much higher production incentive than out of state systems. You can reach your \$5,000 a year limit much faster, without overproducing for your home or business. See the chart below for exact amounts.

	Made in WA Panels	Out of State Panels
Made in WA Inverter	54 cents per kWh	18 cents per kWh
Out of State Inverter	36 cents per kWh	15 cents per kWh

### 2 Local Manufacturers:

Silicon Energy and Itek Energy are both local manufacturers offering high quality components.

**Made** in Marysville Washington

**Made** in Bellingham Washington

#### Cost

Fully Manufactured in WA Systems Start at \$19,000 before 30% Federal Tax Credit

#### Cost

Systems using Made in WA Panels with out of State Micro Inverters Start at \$8,000 before 30% Federal Tax Credit

#### Warranty

30 year limited power warranty, 5 year materials and workmanship

#### Warranty

25 year power output, 10 year workmanship

#### Unique Features

- Unique "cascade" mounting system
- Available in custom colors
- Currently manufacture Inverters in Washington as well

#### Unique Features

- Traditional flat panel design
- Currently manufacture Inverters that are not considered Made in WA
- Expect a Made in WA inverter in April

## *South Sound Solar*

Will be presenting at  
**Sustainability Summit:  
Unleashing our Creative Genius**  
**Saturday April 14<sup>th</sup>, 9-4**  
**South Puget Sound Community College**

Join us at the kickoff of our transition to a resilient, sustainable and more hopeful future.

### AT THE SUMMIT WE WILL...

- CONNECT with our community.
- LEARN what our community needs.
- ENVISION a better future.
- UNLEASH our creative genius.
- CELEBRATE positive action.

### PARTNERS

BRICK, Enterprise for Equity, GRuB, Northwest EcoBuilding Guild, SPEECH, Sustainable South Sound, The Sherwood Press, Thurston Climate Action Team, Thurston County Solid Waste, TC Pro-Net, Transition Olympia-Climate Action, **South Sound Solar**

[www.TransitionOlympia.org](http://www.TransitionOlympia.org)

Advancing our local community's transition toward a resilient, sustainable, and hopeful future.

## Solar Washington Project of the Month

Solar Washington is featuring our installation at 3400 Capitol Blvd in Tumwater as their project of the month for March.

“3400 Capitol Boulevard still looks like any other office building in Tumwater when viewed from the street. However it's 48 panel solar array makes it unique to every office building around. Owned by Renee Ries, whose business Fairchild Record Search is the main tenant, this building has undergone quite the journey. Starting with an Energy Audit by Thurston Energy, all the way to applying for financing from the USDA's REAP program, the collaboration of many local organizations is what made it all possible...”
